Sales Performance Dashboard

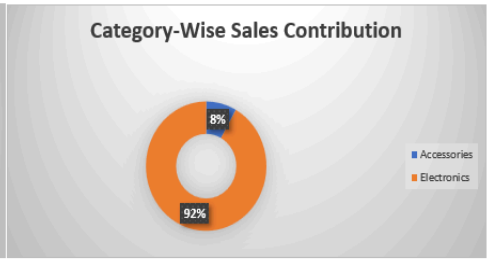

SALES PERFORMANCE DASHBOARD

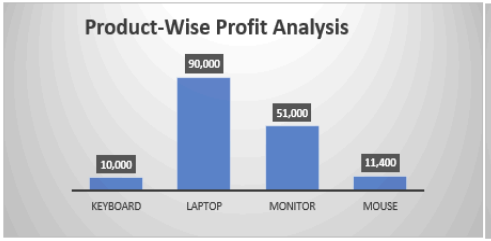

TOTAL SALES	AVERAGE ORDER VALUE	TOTAL PROFIT	TOTAL QUANTITY	TOTAL ORDER
₹ 7,12,500	₹ 28,500	₹ 1,62,400	108	25

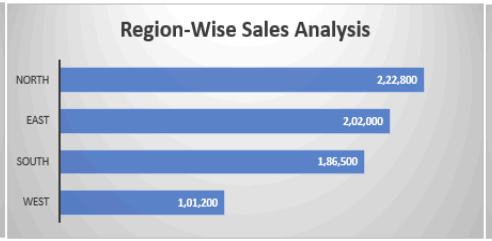

Category: Accessories | Electronics

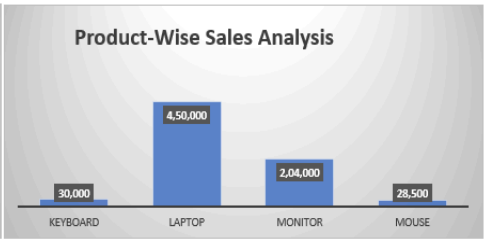

Region: East | North | South | West

KEY INSIGHTS

- Laptop is the biggest driver: 63% of total sales and 55% of total profit.
- Electronics contributes 92% of sales, while Accessories adds only 8%.
- North leads with ₹2,22,800 (31% of sales); West is the weakest at ₹1,01,200 (14%).
- Accessories have the best margins (Mouse 40%, Keyboard 33%) vs Laptop at 20%, but contribute little revenue.
- Sales fell about 17% from January (₹2,56,300) to March (₹2,11,900), and orders dropped from 10 to 7.
- Recommendation: bundle accessories with laptop sales and push growth in the West region.

Based on the full dataset (25 orders, Jan-Mar 2026). This box does not change with slicers.

PROJECT REPORT

Objective
To build an interactive Excel dashboard that analyses sales, profit, quantity and orders by product, region, category and month, and to turn the results into actionable insights.

Dataset
Sample sales dataset (25 orders, Jan-Mar 2026) with order date, region, product, category, quantity, price, cost, sales and profit.

Approach
1. Organised the data as an Excel Table.
2. Built PivotTables and PivotCharts for product sales, product profit, region sales, category share and monthly trend.
3. Added Region and Category slicers connected to all pivots, so the whole dashboard filters together.
4. Created KPI cards (total sales, average order value, profit, quantity, orders) linked to a PivotTable with GETPIVOTDATA.

Key Insights
- Laptop contributes 63% of sales and 55% of profit.
- Electronics is 92% of sales; Accessories only 8%.
- North is the strongest region (31%); West is the weakest (14%).
- Mouse (40%) and Keyboard (33%) have higher margins than Laptop (20%).
- Sales fell about 17% from January to March 2026.

Recommendations
- Bundle accessories with laptop sales to use their higher margins.
- Focus growth efforts on the West region.
- Investigate the decline in orders from January to March.

Limitations
Small sample dataset and a three-month period, so the trends are indicative only.

Tools: Excel (PivotTables, PivotCharts, Slicers, GETPIVOTDATA)
